PROFESSIONAL SUMMARY

Full-stack developer with a B.Tech in Computer Science and hands-on experience building and deploying production-grade MERN stack applications and AI-powered systems. Proficient in React, Node.js, RESTful APIs, and OOP principles, with a strong foundation in data structures, DBMS, and the software development lifecycle (SDLC). Passionate about building scalable, secure systems and eager to contribute to real-world engineering challenges.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, TypeScript (basic), Bootstrap, Vite

Backend: Node.js, Express.js, RESTful APIs, Socket.io, MVC Architecture

AI & Automation: Python, CrewAI, Multi-Agent Systems, Prompt Engineering, AI API Integration

Database & SQL: MongoDB, MongoDB Atlas, MySQL, SQL, Relational Database Design, DBMS

Core Concepts: OOP (Object-Oriented Programming), Data Structures, SDLC, REST API Design

Tools & Platforms: Git, GitHub, Postman, VS Code, Render, Arcjet, Java, CI/CD Pipelines

PROJECTS

VibeChat — Real-Time Chat Application — vibechat-ty1w.onrender.com

- Built a full-stack real-time chat app using React (Vite) and Node.js/Express, following clean component architecture and OOP-aligned service patterns; integrated Socket.io for live messaging and MongoDB Atlas for persistent data storage.
- Designed and consumed RESTful APIs for authentication, messaging, and user management, with JWT-based auth and protected routes — demonstrating strong API design and backend development fundamentals.
- Configured a CI/CD pipeline via GitHub; deployed on Render with automated builds and managed feature branch Git workflows, following standard SDLC practices throughout development.
- Integrated Arcjet for rate limiting and security hardening; implemented responsive UI with real-time toast notifications via Socket.io and backend populate queries.

Tech: React.js, Node.js, Express.js, Socket.io, MongoDB Atlas, REST APIs, JWT, Arcjet, Git, CI/CD, Render

SmartLegalAssistant — AI-Powered Legal Research Tool — github.com/AqdasAmir/SmartLegalAssistant

- Developed a Streamlit-based AI legal assistant using Python and CrewAI framework to automate complex legal research; designed a multi-agent system with specialized agents applying OOP and modular design principles.
- Integrated external AI APIs and advanced prompt engineering to deliver structured, context-aware legal outputs — gaining practical exposure to Agentic AI and emerging AI technologies.
- Optimized app startup performance using lazy-loading via `st.cache_resource` and background threading, reducing initialization time significantly — demonstrating attention to performance and scalability.

Tech: Python, Streamlit, CrewAI, Multi-Agent Systems, AI API Integration, Prompt Engineering, FAISS

Rental Listing Platform — Full-Stack Web Application — rental-listing-fpgh.onrender.com

- Built and deployed a full-stack rental listings platform with JWT authentication, full CRUD operations, a reviews system, and a responsive UI — demonstrating end-to-end full-stack development competency.
- Designed RESTful APIs following MVC architecture using Node.js, Express.js, and MongoDB; applied SDLC best practices including modular code organization and version control throughout.

Tech: Node.js, Express.js, MongoDB, EJS, MVC, RESTful APIs, JWT, Git, Render

EDUCATION

B.Tech in Computer Science & Engineering 2022 – 2026 (Completed)

Babu Banarasi Das University (BBDU), Lucknow

Senior Secondary (XII) — CBSE 2020

Ziauddin Khan Memorial Senior Secondary School, Azamgarh

CERTIFICATIONS & TRAINING

- MERN Stack Development & DSA — GrasTech (1-Month Intensive Training)
- Soft Skills Training — Learnovate Enterprises
